

NETWORK INDUSTRIES, LTD. CHEMICAL CLEANING

Network Industries, LTD., Chemical Division, uses the most aggressive, yet safe, line cleaner and scale remover ever formulated for Cold or Hot process. Blow Out, a 100% Synthetic Acid based product is the World's first and only non-acid line cleaner, scale remover and calcium dissolver that is stronger than hydrochloric (muriatic) and hydrofluoric acids. Blow Out attacks hardened lime, scale and calcium deposits more aggressively than all traditional acids.

Because Blow Out is 100% synthetic, it is non-DOT and TDG regulated, is readily biodegradable per OECD 301 D and has the most outstanding environmental profile in the industry.

Blow Out was formulated to dissolve all deposits at a higher rate than Hydrochloric Acid with little to no metal pull and neutralizes instantly with ambient temperature fresh water.

Blow Out is environmentally safe, people safe, and pipe safe.

TESTIMONIALS

"... highly effective in cleaning four years accumulation of deposits from the interior of the sewage system piping." ***Lt. Anthony Palmer, USCGC VALIANT***

"... environmental friendliness of your product resulted in cost savings of \$1000 in waste disposal fees." ***Lt. Paul Stukus, USCGC VIGILANT***

"... the threat of personnel injury due to mishandling or spillage was reduced by the knowledge that exposure to Blow Out would not cause harm that could be expected following exposure to other commonly used cleaning agents." ***John McDonald, Environmental Manufacturing Solutions***

"... is acceptable for discharge into the HRSD sewer system." ***Matt Cox, Hampton Road Sanitation Department***

"... (Network) did an awesome job on my evaporator. I would highly recommend them and hope they can come back." ***John L. Goode, MIDANT RMC, USS OAK HILL***

CONTRACT INFORMATION

Contract Number: N/A

Job Title: USS OAK HILL

Job No.: N/A

Contract Type: Chemical Clean Demonstration with Blow Out

Performance Period: 1/24/05 to 1/28/05

DESCRIPTION OF SERVICES PROVIDED

In a demonstration to Commander Amphibious Group 2 at the Little Creek Naval Station, Network Industries, LTD., gave an exhibition of its product "Blow Out" by chemically cleaning the evaporator coils on the USS OAK HILL (LSD-51). The successful demo was 3½ days from set up to clean up.

***Note:** In the e-mail that follows the Chief Engineer of the USS OAK HILL (LSD-51) to John L. Goode, MIDANT RMC, said that Network Industries, LTD. "did an awesome job on my evaporator" and "If any more of these deals come up, send them my way please." Also, "I would highly recommend them and hope they can come back."*

Job Title: USS ROBERTS

Job No.: 16113

Contract Type: Indefinite-Delivery/Indefinite Quantity

Performance Period: 12/20/04 to 1/08/05

DESCRIPTION OF SERVICES PROVIDED

Network Industries, LTD., Chemical Division, chemically cleaned Port and Starboard CHT system lines which had been cleaned less than a year before by a competitor. The piping system came exceptionally clean. However, during OP testing the flow from urinals was not good. Network removed five (5) urinals with spuds which were extremely coagulated with calcium and cleaned chemically to a new state which proved to operate as they should.

Note: Ship gave Network a commendation letter of thanks from the crew and captain.

CONTRACT INFORMATION

Contract No: DTCG80-03-Q-3FA298

Job Title: USCGC VIGILANT

DESCRIPTION OF SERVICES PROVIDED

Network Industries, LTD., Chemical Division, chemical cleaned the sewage and grey water piping system of the vessel with Blow Out. The vessel had four years of accumulated deposits in the interior of the sewage system piping and had a severe clog in the sewage tank vent piping.

Network successfully cleaned the sewage piping system and eliminated the clog in the sewage tank vent piping.

***Note:** Lieutenant P.D. Stukus was so impressed with results of the flushing that in a letter he stated "I consider the completion of our sewage system cleaning to be an effective 'prototype' use of your product for this application onboard U.S. Coast Guard cutters." He also stated in the letter that "The environmental friendliness of your product resulted in cost savings of approximately \$1,000 in waste disposal fees (quoted by a contractor as 80 cents per gallon, plus transport)."*

The Lieutenant sent a copy of this letter to the U.S. Coast Guard Maintenance and Logistics Command Atlantic.
